- INSIGHT INTO THE JKR TENDER EVALUATION PROCESS

**CPD/CCD
POINTS
APPLIED**

Organized by:

Association of Professionals
of Public Works Department Malaysia

In Collaboration with:

Public Works Department Malaysia

OVERVIEW

The PK 2.1 Kaedah Perolehan Kerajaan or Government Procurement Method have outlined several procedures that must be followed in executing government procurement including works procurement.

In general, work procurement valued exceeding RM500,000.00 will be done through open tender. However, works procurement for high profile projects which requires specific expertise such as hospitals and airports can be done through Pre-Qualifications open tender. Contractors selection for both methods will be done through tender evaluation based on established criteria.

Tender evaluation process is one of the critical processes that needs to be carefully implemented to ensure that the selected tenderers are financially and technically capable to compete and succeed the project. For the government projects managed by JKR, this process is implemented in accordance with established guidelines in accordance with current procurement procedures.

In this regard, the seminar will provide exposure and knowledge on the key points involved in the tender evaluation process as follows :

- i. Small tender evaluation tender criteria
(Not Exceeding RM 20 million)
- ii. Big tender evaluation criteria
(Exceeding RM 20 million)
- iii. Pre - Qualification evaluation criteria

OBJECTIVE

Explain the procedure for the works tender evaluation carried out by JKR

Explain the procedure for the Pre-Qualification tender evaluation carried out by JKR
